15. Home page	31
16. Instagram and AI assistance	33
17. Troubleshooting	35
18. Restricted Payload CMS use	36
19. Deferred capabilities and acceptance	37

1. Start safely

This handbook assumes no previous ecommerce administration experience. Use the storefront admin first. Payload CMS is a technical, exceptional area.

1 Main navigation. 2 Search, notifications and exports. 3 Metrics and priority actions.

Sign in and sign out

SAFE ROUTINE ACTION

1. Open <https://ao.usemewithstyle.shop/admin> or <https://pt.usemewithstyle.shop/admin>.
2. Enter the email address and password supplied separately.
3. Confirm that the account name appears at the bottom of the sidebar.
4. When finished, choose Log out, especially on a shared computer.

Change the admin language

SAFE ROUTINE ACTION

1. Use PT or EN under the logo. This changes admin labels, not the language published on the storefront.
2. When editing bilingual content, always complete both Portuguese and English fields when available.

Interpret safety labels

CHECK BEFORE PUBLISHING

1. Safe routine action: suitable for everyday operations.
2. Check before publishing: review copy, price, image and market before saving.
3. Contact Jose first: payments, VAT, infrastructure, integrations or unexpected behavior.
4. High-impact action: deletion, unpublishing or a change affecting existing customers.

2. Daily routine and dashboard

The dashboard summarizes orders, paid revenue, pending confirmations, processing, low stock, market performance and operational health.

1 Today's cards. 2 7/30/90-day period. 3 Attention queue and trends.

Morning check

SAFE ROUTINE ACTION

1. Open Dashboard and check Needs confirmation, Processing and Low stock.
2. Open each card through View details to apply the correct filter automatically.
3. Review the Attention queue. Handle payments, overdue orders and out-of-stock variants first.
4. Compare Angola and Portugal without adding Kz and EUR together. They are separate currencies and markets.

Change the reporting period

SAFE ROUTINE ACTION

1. Choose 7d, 30d or 90d in Market performance or Revenue trend.
2. Choose Revenue or Orders to change the chart.
3. Click a daily bar to open that day's orders.

Export the summary

CHECK BEFORE PUBLISHING

1. Choose Export summary for a quick report for the current period.
2. Choose Download detailed CSV when row-level analysis is needed.
3. Store files securely: they may include personal and commercial data.

3. Orders, payment and fulfilment

The orders list supports search, filtering, export and order detail access. The detail page controls payment, processing, shipment, delivery and documents.

Order queue

Capture customer details, confirm payment, coordinate delivery, and update status.

From date and time: dd/mm/yyyy, --:-- To date and time: dd/mm/yyyy, --:--

Both markets 4 Angola 3 Portugal 1

All 4 New 1 Payment Review 0 Processing 1 Shipped 1 Delivered 1 Cancelled 0

4 filtered orders will be exported. Phase 2: saved templates, column picker, Excel workbooks, scheduled reports and email delivery.

ORDER	DATE AND TIME	CUSTOMER	MARKET	PAYMENT	DELIVERY	TOTAL
#PT-410652	22/08/2026, 22:00	Diana Training	PT	Manual coordination (W...	CTT Standard (untra...)	39.9 EUR
#AO-402769	22/08/2026, 22:00	Carla Manual	AO	Manual coordination (W...	Local courier	12,999 Kz
#AO-395431	22/08/2026, 21:59	Beatriz Demonstração	AO	Manual coordination (W...	Local courier	12,999 Kz
#AO-388725	22/08/2026, 21:59	Ana Formação	AO	Manual coordination (W...	Local courier	12,999 Kz

1 Search and filters. 2 Status, payment and market. 3 Export and detail access.

Find an order

SAFE ROUTINE ACTION

1. Open Orders.
2. Search by order number, name or email.
3. Use market, status, payment and date filters to narrow the list.
4. Clear filters when finished so new orders are not hidden.

Confirm a manual payment

HIGH-IMPACT ACTION

1. Open an order in Payment review.
2. Confirm outside the application that payment was genuinely received.
3. Choose Confirm payment once only.
4. The application records payment, moves the order into fulfilment, generates the internal commercial document and sends confirmation email.
5. Check the event history, invoice and email. Do not click again if the page is slow; refresh and verify the state first.

At AppyPay launch, follow the gateway-confirmed state. WhatsApp remains only as an activatable fallback.

Process and ship

SAFE ROUTINE ACTION

1. After payment, mark the order as Processing.
2. Compare items, variants, quantities and address. Address line 2 should appear separately.
3. Prepare the parcel and enter the CTT tracking code when applicable.
4. Mark it Shipped. The customer receives the shipping email.
5. Mark it Delivered only after delivery is confirmed.

Cancel

CONTACT JOSE FIRST

1. An order can only be cancelled while it is New.
2. After payment confirmation, the cancel button is unavailable. Do not force a change through another system.
3. If payment was confirmed, contact Jose for the correct procedure; the robust returns workflow is deferred to Phase 2.

Print and view documents

CHECK BEFORE PUBLISHING

1. Use the packing slip to pick items from inventory.
2. Open the Invoice/PDF from the order or Invoices page.
3. The current document is an internal commercial document; it is not certified fiscal invoicing.

4. Products, images, prices and stock

Products controls everything the customer sees and can buy: photography, bilingual names, category, badges, prices, sale, variants, stock and markets.

The screenshot displays the 'UseMe' product management interface. On the left is a sidebar with navigation links: Dashboard, Orders, Products (highlighted), Articles, Settings (marked with a '1'), Customers, Messages, Invoices, Media, and Discounts. A 'Phase 1 launch admin' banner is also visible. The main content area shows the product form for 'TRAINING — Vestido de demonstração — HANDBOOK-TRAINING-2026-08-22'. The form includes fields for product name in Portuguese and English, status (Active), product type (Standard product, marked with a '2'), category (FORMAÇÃO — Demonstração / TRAINING), and merchandising tags (Quase esgotado / Almost gone, Bestseller, Novidade / New). It also has a size guide dropdown (None) and a product checklist. The pricing section includes fields for Angolan price (Kz), Portuguese price (EUR), and shipping weight (g). The stock section shows current stock (9999) and sale price (35). The variant section allows for color and size selection, with a 'Size' dropdown (marked with a '3') and a 'Color' dropdown. The product details section includes fields for material, care, and training example. The bottom of the form has checkboxes for 'Published', 'Available in Angola', 'Available in Portugal', and 'Eligible for normal returns', along with fields for return notes in Portuguese and English. The form is saved and changes are deleted.

1 Gallery and colour assignments. 2 Commercial data and variants. 3 Publishing, markets and Save changes.

Create a product

CHECK BEFORE PUBLISHING

1. Open Products and choose New product.
2. Complete Portuguese and English names. The slug is generated automatically and must not be changed.
3. Choose Standard product or Product kit. A standard product requires at least one variant; a kit requires components.
4. Choose category, merchandising tags and a size guide where applicable.
5. Keep it as Draft until images, prices, descriptions, stock and markets are complete.

Add and crop photographs

CHECK BEFORE PUBLISHING

1. Choose Add photo and select JPG, PNG or WebP within the displayed limits.
2. In the editor, adjust framing and zoom. Confirm the requested version before saving.
3. A preview appears before persistence. The photo only becomes part of the product after Save changes.
4. Enter useful alternative text. If left blank, the application falls back to the product name.
5. Assign a photo to a colour when it should only appear for that colour. Leave it General to show across all colours.
6. Choose the cover photo and reorder the remainder.

Set price and sale

CHECK BEFORE PUBLISHING

1. Enter the AO price in Kz and PT price in EUR separately.
2. A sale price must be lower than the regular price.
3. Start and end dates are optional. Without dates, the sale remains active while a sale price exists.
4. Confirm on the storefront product that the regular price is struck through and the sale price is highlighted.

Manage variants and stock

SAFE ROUTINE ACTION

1. Specify whether the product has colours and/or another option such as size or capacity.
2. Select colours and enter comma-separated option values.
3. Complete AO and PT stock for every combination. They are independent inventories.
4. Zero means sold out for that variant. Stock of two or less appears in the low-stock alert.
5. Never reduce stock to correct an order without checking its history first.

Publish by market

CHECK BEFORE PUBLISHING

1. Enable Published when the product is ready.
2. Use Available in Angola and Available in Portugal to control each storefront.
3. Save and open both stores to confirm name, price, stock, images and description.

Delete or unpublish

HIGH-IMPACT ACTION

1. Prefer unpublishing when the item may return.
2. Deletion removes the product from the admin and may affect links, articles or operational history.
3. Before deleting, confirm dependencies and preserve any required data.

Example verified in the production application during the controlled training window.

Example verified in the production application during the controlled training window.

Example verified in the production application during the controlled training window.

Example verified in the production application during the controlled training window.

5. Categories, tags, colours and size guides

Settings > Products contains reusable structures that automatically become available in the product editor.

1 Definition types. 2 List and creation. 3 Effect on products and storefront navigation.

Create a category

CHECK BEFORE PUBLISHING

1. Open Settings > Products > Categories.
2. Enter PT name, EN name and introductory copy in both languages.
3. Add the tile image and adjust the crop.
4. Save. The category becomes available to products and storefront navigation/filters.
5. A category in use cannot be deleted until products are reassigned.

Manage tags and colours

SAFE ROUTINE ACTION

1. Create bilingual tags for badges such as New or Bestseller.
2. Create colours with PT/EN names and a visual value. Internal identity remains stable if the name changes.
3. Assign tags and colours to products. Verify cards, selectors and galleries on the storefront.

Manage size guides

CHECK BEFORE PUBLISHING

1. Create a reusable table with labels and measurements.
2. Assign it to all relevant apparel products.
3. Use the product fit note for specific recommendations.
4. Confirm the product and public Size guide page.

Example verified in the production application during the controlled training window.

Example verified in the production application during the controlled training window.

6. Customers

Customers is a lightweight operational record created from orders. It is not a customer-account system.

1 Search and export. 2 Contact details. 3 Order history.

View and correct a customer

CHECK BEFORE PUBLISHING

1. Open Customers and search by name or email.
2. Open the detail to see contact information, market and related orders.
3. Correct confirmed errors only. Editing the customer does not automatically rewrite historical order addresses.
4. Use Export customers only for a legitimate operational purpose.

Protect personal data

HIGH-IMPACT ACTION

1. Do not share exports through public channels.
2. Do not copy addresses, telephone numbers or emails into handbooks or screenshots.
3. Delete exported files when they are no longer required.

Example verified in the production application during the controlled training window.

7. Messages and Instagram support

Messages brings together Instagram conversations, conversation status, priorities, customer/order links and AI draft assistance where available.

1 Conversation list. 2 Priority and status. 3 Reply, internal note and associations.

Handle a conversation

CHECK BEFORE PUBLISHING

1. Open Messages and handle Priority and Needs reply first.
2. Read the full context and check for a related customer or order.
3. Use internal notes for information that must not be sent to the customer.
4. If an AI draft exists, verify product, price, stock, market and policy before approval.
5. After replying, mark Waiting on customer or Done as appropriate.

Send a reply

CHECK BEFORE PUBLISHING

1. Write a clear, professional message in the customer's language.
2. Do not promise stock, price, timing or refunds without confirmation in the system.
3. On send, the message is transmitted to Instagram and recorded in the conversation.

Webhook or delivery failure

CONTACT JOSE FIRST

1. Do not attempt to change tokens or technical settings.
2. Record the time, user, error text and a screenshot.
3. Contact Jose through the agreed emergency channel.

8. Internal invoices

Invoices lists internal commercial documents generated by the application. Filter by status and market and open the immutable PDF.

Settings / Invoices

Internal invoices

Commercial documents for accounting support -- not certified fiscal invoices. Immutable once generated.

All 1 Issued 1 Failed 0 Both markets Angola Portugal 2

INVOICE #	MARKET	CUSTOMER	ORDER	STATUS	TOTAL	ISSUED	
UMWS-AO-2026-00001	AO	Ana Formação - training.1@example.com	#AO-388725	Issued	12,999 Kz	8/22/2026	PDF 3

1 Filters. 2 Number, customer and order. 3 Status, total and PDF.

View an invoice

CONTACT JOSE FIRST

1. Open Invoices and filter by Issued/Failed and market.
2. Confirm number, order, customer, total and date.
3. Open PDF to review lines, VAT, subtotal, shipping and total paid.
4. If generation fails, do not create numbers manually; contact Jose.

Phase 1 limitation

CHECK BEFORE PUBLISHING

1. The current PDF is an internal commercial document for accounting support.
2. It is not a certified fiscal invoice. SWEG/FactPlus integration is a future decision.

9. Media library

The media library shows each image once, its assignments and alternative text. Deletion may remove it from several locations.

1 Search and upload. 2 Preview and alt text. 3 Usage locations and deletion.

Upload and reuse

SAFE ROUTINE ACTION

1. Upload JPG, PNG or WebP within the displayed limits.
2. The application optimizes the file. Confirm sharpness and framing where it is used.
3. Before uploading an image again, search for an existing copy.
4. Use the usage list to understand where it appears.

Delete an image

HIGH-IMPACT ACTION

1. Open usage information and confirm all related products, categories or content.
2. Replace the image first wherever content must remain published.
3. Delete only after every consequence is understood.

10. Discounts and promotional codes

Discounts manages percentage, fixed-amount and free-delivery codes with markets, dates, limits and minimum values.

Settings / Discounts

Coupon codes

Percentage or fixed-amount discounts shoppers apply at checkout. Editing or deleting a code * changes past orders that already used it.

TRAINING20 ACTIVE	20% off	— → —	Used 0 / 20	HANDBOOK-TRAINING-2026-08-22	Edit Delete
TEST20 EXPIRED	20% off	8/13/2026 → 8/18/2026	Used 1 / 100	Testing something	Edit Delete
SUMMER20 EXPIRED RESTRICTED: AO	20% off	8/6/2026 → 8/8/2026	Used 1 / 10	Summer Discount	Edit Delete

1 List and status. 2 Type and value. 3 Markets, limits and dates.

Create a code

CHECK BEFORE PUBLISHING

1. Choose New discount and enter a simple code; it is stored in uppercase.
2. Choose Percentage, Fixed amount or Free delivery.
3. Set Angola/Portugal, minimum values, dates, total limit and per-email limit.
4. Save as active only after reviewing the campaign.
5. Test in the authorized markets' checkout and confirm the summary before announcement.

Disable instead of delete

HIGH-IMPACT ACTION

1. Disable the code to end a campaign while preserving order history.
2. Delete only unused test codes with no historical value.

11. Articles and style guide

Articles publishes bilingual editorial content to capture demand, explain the brand and help customers choose products.

CHECK BEFORE PUBLISHING

1. Open Settings > Policies and choose the correct area.
2. Keep Portuguese and English consistent without promising anything operations cannot deliver.
3. Save and verify Help, FAQ, footer and checkout.

Edit invoicing

CONTACT JOSE FIRST

1. Verify legal name, tax ID, address, prefix, VAT and bank details against official documents.
2. Never change the prefix or sequence of issued documents without accounting and technical guidance.
3. Generate a test document and validate every line before production use.

Edit privacy and terms

CONTACT JOSE FIRST

- 1. Use approved wording only.
- 2. Keep a copy of the previous version and record the effective date.
- 3. Verify the public pages in both languages.

Internal invoicing

Commercial (non-fiscal) invoice generation, per market.

ContentMarketsPolicies & contentInvoicingLegal pagesHome pageProducts & categoriesInstagram feedAI messaging bot

Snapshoted onto each invoice at issue time -- editing here doesn't rewrite invoices already generated.

Required non-fiscal disclaimer -- Portuguese

Documento comercial interno, não certificado fiscalmente. Deve ser validado e tratado pelo contabilista da entidade emitente.

Required non-fiscal disclaimer -- English

Internal commercial document, not fiscally certified. Must be validated and processed by the issuing entity's accountant.

Choose...

Previous versions
Every save keeps the version it replaces, so you can bring back an older homepage later. Restoring makes that version current (and itself becomes a new entry in this list).
No previous versions yet — they'll appear here after your next save.

Homepage collections
Any number of product shelves, each driven by a merchandising tag (e.g. "New", "Bestseller", "SS26"). Leave empty to keep the previous New Arrivals / Featured sections. **Save collections**

1 Bilingual copy and link. 2 Desktop/mobile images. 3 Category/collection selection and versions.

Update the hero

CHECK BEFORE PUBLISHING

1. Complete eyebrow, headline, subtitle and button in PT/EN.
2. Choose the button link to catalogue, category or another supported destination.
3. Upload the image and adjust desktop first, then mobile, in the editor.
4. Confirm both previews. The image is only applied when the hero is saved.
5. Open the home page on desktop and mobile before finishing.

Manage versions

HIGH-IMPACT ACTION

1. Each save retains earlier versions for the displayed area.
2. Use Restore to return to a confirmed version.
3. Delete old versions only when certain they are no longer required.

16. Instagram and AI assistance

Instagram selects the highlighted post and product associations. AI settings control limited message assistance, not autonomous sales decisions.

1 Highlighted post. 2 Product/variant association. 3 AI status and rules.

Highlight a post

CHECK BEFORE PUBLISHING

1. Open Settings > Instagram and wait for recent posts to load.
2. Choose a post for the large tile and associate the correct products.
3. For variants, confirm the exact colour and size.
4. Save and verify Shop Instagram in AO and PT.

Configure AI assistance

CONTACT JOSE FIRST

1. Use only the available settings. Do not change tokens, models or webhooks outside the admin.
2. Keep human review for price, stock, payments, policies, complaints and sensitive data.
3. If replies appear incorrect, pause automation and contact Jose.

Example verified in the production application during the controlled training window.

17. Troubleshooting

Perform safe first-line checks. Do not attempt direct repairs to infrastructure, database, tokens, webhooks or payments.

A saved change does not appear

SAFE ROUTINE ACTION

1. Confirm that a success message appeared.
2. Reload the admin page and verify that the value persisted.
3. Open the correct AO or PT storefront and confirm the language.
4. Refresh the storefront once. If still incorrect, record URL, time, steps and screenshot.

An image is blurred or cropped

SAFE ROUTINE ACTION

1. Confirm the original file, format and dimensions.
2. Reopen the crop editor and adjust desktop/mobile separately where available.
3. Avoid enlarging a small image to fill a large area.

Technical error or outage

CONTACT JOSE FIRST

1. Do not repeat payment, deletion or send actions.
2. Record market, URL, user, time, error message and screenshot.
3. Contact Jose through WhatsApp. Raisa has authority to pause sales when necessary.

18. Restricted Payload CMS use

Payload CMS at <https://cms.usemewithstyle.shop/admin> is the technical content and data layer. The storefront admin must be used for daily work.

When to enter

CONTACT JOSE FIRST

1. Enter only when a required task is unavailable in the storefront admin and after confirming with Jose.
2. Do not experiment with technical collections, relationships, users, settings or historical data.
3. Never perform bulk deletion, migration or infrastructure changes.

19. Deferred capabilities and acceptance

Phase 1 does not include robust returns, certified fiscal invoicing, final AppyPay/Paybird payments, full accounts, wishlist, loyalty, VIP, advanced campaigns or advanced roles.

Handbook acceptance

CHECK BEFORE PUBLISHING

1. Raísa completes representative tasks using only the Portuguese handbook during the recorded session.
2. José corrects any hesitation caused by incomplete instruction or an outdated image.
3. José approves technical accuracy; Raísa approves language, usability and presentation.
4. Both language versions receive the same version number and change log.
