

CONTROLLED TECHNICAL RECORD

Phase 1 Final Evidence Map

Approved, redacted evidence for closeout and client handoff

Field	Controlled value
Document	UMWS-P1-EM-001
Version	1.0
Issue date	22 August 2026
Owner	Jose - project manager and QA owner
Client approver	Raisa
Classification	Client-shareable technical index; no secrets
Storefront release	a5ad493ed412ae21610a5ba0be726837e7b7c440
CMS application baseline	83bedc4e083cdc4fc5853f4efa245a6fa05a0443
CMS documentation baseline	1bd2feaf2e31e143b7cef0cba2a652fee79d1d7a
Gate 6.3 status	Evidence map issued and linked

PURPOSE

This map connects the accepted Phase 1 scope to authoritative tickets, controlled handoff documents, repository records and redacted operational evidence. It is an index, not a credential store or a replacement for the source artifacts.

Security and disclosure boundary

- No token, password, private key, recovery code, environment value, customer record or private access URL is reproduced.
- Provider evidence is referenced by public or access-controlled record identifier only; authorised operators use provider consoles for details.
- Secrets remain in approved provider secret stores and recovery custody locations defined in UMWS-P1-AR-001.
- The client-facing source of truth is the controlled Notion handoff page; Linear holds issue state and ownership.

1. Controlling scope and decision evidence

Control	Authoritative evidence	Disposition
Phase 1 scope and launch model	Notion: Entrega da Fase 1 - Pacote Controlado; Linear project controlling description; JOS-52.	WhatsApp checkout for AO/PT; accepted
Payments	JOS-57 and JOS-61; UMWS-P1-DR-001; Phase 1 limitations register.	AppyPay live activation and Paybird are Phase 2; WhatsApp fallback remains
Fiscal documents	JOS-60; UMWS-P1-DR-001; UMWS-P1-LW-001.	Internal non-fiscal documents accepted for Phase 1; certified providers deferred
Returns	Public 14-day policy; platform/docs/phase-2-returns-self-service.md; deferral register.	14-day policy active; robust self-service workflow is Phase 2
Authority and continuity	UMWS-P1-AR-001; UMWS-P1-TR-001; controlled handoff page.	Raisa operates and may pause sales; Jose owns technical response
Client acceptance boundary	JOS-55, JOS-56 and JOS-166; UMWS-P1-QA-001.	Only catalogue/content, training and formal acceptance remain open

PRECEDENCE

Where an older kickoff, status report or requirements page conflicts with this map, the controlled handoff page, reconciled Linear project and owner-approved closeout decisions take precedence. Historical pages remain marked as historical for traceability.

Authoritative online records

- Notion handoff: <https://app.notion.com/p/3c4cb5a5fd7a813aaf2ef7c4a765785a>
- Linear project: <https://linear.app/joses-workspace-1/project/use-me-with-style-platform-37c7b8734a16>
- Storefront repository: <https://github.com/jose-nogueira1/use-me-with-style-platform>
- CMS repository: <https://github.com/jose-nogueira1/use-me-with-style-cms>

2. Release and technical verification evidence

ID	Evidence source	What it proves
E01	platform/docs/closeout/gate-1-technical-verification-2026-08-21.md	Storefront lint, 149/149 tests, build/prerender, 30/30 browser E2E, domains and audit
E02	cms/docs/gate-1-technical-verification-2026-08-21.md	CMS lint, 166 applicable tests, build, isolated PostgreSQL migration 20/20 and risk disposition
E03	platform/docs/closeout/gate-2-visual-qa-2026-08-21.md	Responsive and brand QA; boundary for Raisa's final catalogue/content approval
E04	UMWS-P1-QA-001 - Final QA and Release Appendix	Consolidated release IDs, tests, production snapshot, security and open sign-offs
E05	Vercel production release for storefront a5ad493e	READY production deployment and AO/PT/apex aliases
E06	Railway/GitHub production deployment for CMS application baseline 83bedc4e	Successful CMS production application deployment
E07	CMS documentation baseline 1bd2fea	Controlled Gate 5 documents and QA appendix; no application/schema change

VERIFICATION SUMMARY

The final QA appendix records storefront lint, 149/149 tests, 30/30 browser E2E, build with 80 prerendered routes, CMS lint, 166 applicable tests and 20/20 isolated PostgreSQL migration tests.

Security disposition

- Storefront production dependency audit: zero runtime vulnerabilities.
- Critical and high findings were resolved before closeout.
- Six moderate transitive findings are confined to nested Payload migration tooling, accepted and monitored with no deployed runtime exposure.
- No unsafe forced dependency override was introduced.

3. Resilience and operations evidence

Control	Evidence	Result / owner
Transactional email	Gate 3 production resilience record; Resend canary workflow reference.	Delivery verified; Jose monitors now, Jose + Raisa at delivery
Cloudflare R2 recovery	cms/docs/closeout/gate-3-production-resilience-2026-08-21.md	Upload/download/restore/checksum rehearsal passed; Jose
PostgreSQL backup and restore	Gate 3 record and encrypted backup workflow reference.	Isolated restore passed; 64 tables / 824 rows / 205 seconds; Jose
Inventory cleanup and heartbeat	cms/docs/operations-observability.md; Gate 3 and Gate 4.5 records.	45-minute freshness threshold; fail-closed alerting; Jose
Operational monitor	Operations monitor workflow reference and Gate 3 record.	Production checks successful; Jose
Incident tabletop	cms/docs/closeout/gate-4-5-operational-tabletop-2026-08-22.md	Outage, recovery, pause-sales and escalation paths rehearsed
Rollback	UMWS-P1-TR-001; platform/docs/production-domain-cutover.md	Provider history + known-good commits + database recovery safeguards
Credential lifecycle	UMWS-P1-TR-001 and UMWS-P1-AR-001	Manual rotation/recovery procedure; no secret values in documents

Access-controlled execution records

- Encrypted PostgreSQL backup workflow: GitHub Actions run 32548213282.
- Inventory heartbeat workflow: GitHub Actions run 32582540607.
- Operations monitor workflow: GitHub Actions run 32582636752.
- Email delivery canary workflow: GitHub Actions run 32563232296.
- Detailed logs remain within the authorised GitHub/provider account boundary and are not embedded in this PDF.

4. Controlled handoff artifact map

Document ID	Controlled artifact	Purpose / owner
UMWS-P1-HI-001	Phase 1 Handoff Index	Authoritative document list and control rules - Jose
UMWS-P1-OG-001	Client Operations Guide	Portuguese client operations - Raísa / Jose
UMWS-P1-TR-001	Technical Production Runbook	English deployment, recovery and incident procedures - Jose
UMWS-P1-AR-001	Production Account and Access Register	No-secret account ownership and recovery metadata - Jose + Raísa
UMWS-P1-LW-001	Known Limitations and Workarounds Register	Accepted limitations, owners and exit conditions - Jose + Raísa
UMWS-P1-DR-001	Phase 2/3 Deferral Register	Deferred scope, dependencies and re-entry criteria - Jose + Raísa
UMWS-P1-ATR-001	Administrator Training Record	Agenda, exercises, competency evidence and signatures - pending session
UMWS-P1-QA-001	Final QA and Release Appendix	Technical verification, release state and exceptions - Jose
UMWS-P1-EM-001	Phase 1 Final Evidence Map	This secret-free cross-reference - Jose

DISTRIBUTION

Approved client PDFs live on the controlled Notion handoff page. Technical sources and evidence remain in the repositories or provider consoles. Superseded records are retained and visibly labelled; they are not silently deleted.

Record reconciliation

- Gate 6.1: Linear reconciled on 22 August 2026. Only JOS-55, JOS-56 and JOS-166 remain open for client-owned closeout evidence.
- Gate 6.2: Notion reconciled on 22 August 2026. The controlled pack is the source of truth and stale pages are marked historical.
- Gate 6.3: this map links approved artifacts and redacted evidence without reproducing secrets.

5. Open approvals and final disposition

Open evidence	Acceptance condition	Owner
Production catalogue and photography	Raisa approves active products, imagery, bilingual copy, prices, variants, stock, colour assignments and alt text.	Raisa; JOS-166
Final visual / brand approval	Jose records the final visual review after client content is complete.	Jose; JOS-55
Administrator training	Remote comprehensive session completed; recording, 18 exercises, competency result and signatures retained.	Jose + Raisa; JOS-56
Formal Phase 1 acceptance	Raisa approves the final pack and Jose + Raisa record the commercial launch decision.	Raisa / Jose; JOS-55

GATE 6.3

ISSUED FOR ATTACHMENT - this evidence map contains only approved artifact links, repository paths, release identifiers and redacted operational references. No secret values are present.

PHASE 1 POSITION

CONDITIONAL - technical closeout is complete. Formal GO remains dependent on catalogue/content approval, completed administrator training and signed final acceptance.

Approval record

Role	Acknowledgement	Date
Project manager / QA owner	Jose - evidence map prepared and disclosure boundary checked	22 Aug 2026
Final pack approver	Raisa - pending final handoff review	_____
